

ESSENTIAL EXTRAS

BENEFIT MANAGEMENT SOLUTION

Introducing Beacon's Essential Extras module to help Medicare plans with the approval and delivery of social or environmental benefits e.g., adult day care, home meal delivery, utilities or dietician services, which are beyond the typical Part C or Part D Medicare benefits.

Functionality:

- **Case Types** – Supplemental Benefit, Community Outreach or Dietician Service
- **Case Categories** – Vary depending on Category Type but launch workflow or tracking of benefits.
- **Workflow and Tasks** –
 - Initiate referral or intake of request for supplemental benefit
 - Verify benefit coverage for service based on plan criteria
 - Finalize request (approve or deny)
 - Track benefit and outreach efforts

Benefit Workflows Available:

- **Personal Care Visits** – Daily living activities help, such as bathing and light housekeeping
- **Healthy Nutrition/Meals** – Meals or supplemental nutrition delivered to your home
- **Adult Daycare** – Caregivers relieved of duties for the day to manage the care of a member with special needs
- **Pest Control** – In-home pest control services provided
- **Service Animal** – Care for service dog provided
- **Other** - e.g., Community Outreach & support, dietician visits and electricity

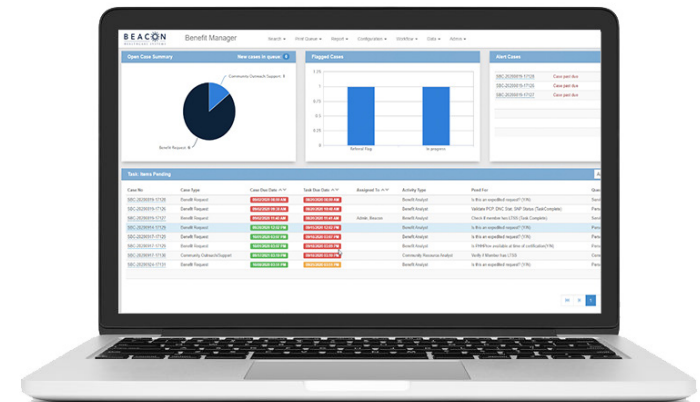

Benefit Workflows Under Consideration:

- **Transportation** – Provide rides to and from personal tasks
- **Utilities** – Support provided for electricity, gas, water or phone coverage
- **Health & Fitness Device** – Issue new devices and provide support for device maintenance

“ *The application, which is customizable and very user-friendly, was designed to streamline the operational processes, and integrates with enhanced reporting capabilities, which we struggled within our previous system.* ”

- Director of Appeals & Grievances - Large Blues Plan
