

SUPPLEMENTAL BENEFITS

Elevate Your Supplemental Benefits Program

Non-medical factors significantly impact individual health outcomes by **as much as 80 percent**. To address these needs, payors are offering a wide array of supplemental benefits to members.

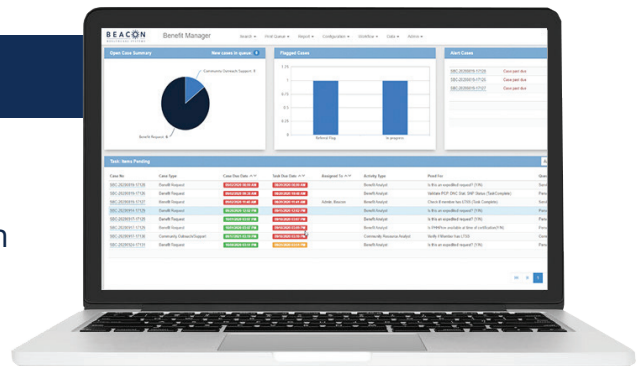

As programs scale, and CMS focuses intently on execution and outcomes, health plans are facing enormous challenges to accurately track, measure, and report on these activities, since they are often managed manually with spreadsheets or other homegrown solutions.

A technical solution is a must-have to serve members well, report into CMS, and make informed decisions on trends in population.

Beacon's Supplemental Benefits module

Designed by our regulatory and compliance experts, Beacon's Supplemental Benefits module answers payor's needs for a scalable, automated solution built on best practices to better address member needs.

- ✓ Customize to your plan's specific benefit offerings
- ✓ Scale as you add benefits, members, and expand to other LOBs
- MA, MA-PD, Medicaid, SNP, SSBCI, and more
- ✓ Streamline operational processes to manage more cases in less time
- ✓ Prioritize resources by skill set to free up clinical staff for member care
- ✓ Confirm benefits and apply clinical criteria in a consistent, reportable manner
- ✓ Monitor all program activity and be audit ready with built-in universe reports
- ✓ Assess report findings to determine impact on outcomes, readmissions, ER visits, MLR, and more
- ✓ Include program details to support successful Medicare and Medicaid bids

Take your supplemental benefits program to the next level with Beacon's automation solution. Capture all activity completely, accurately, and timely. The results will elevate services for your member.
